

Spider Nature Explorer

By Jonathan Leeming

Spider Scramble 2

Spider Biodiversity

Southern Africa is home to about 2,500 species of spider, with many more species that are yet to be discovered. These fascinating creatures can be found in a wide variety of habitats such as forests, savannah, deserts, mountains, wetlands, coastal forests, the sea shore, in your back garden and even inside your home. Fill in the blanks and decode the following spider names. All of these spiders are mentioned in the Spider Nature Explorer.
